Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wood (4,997,196).

3. Wood discloses the claimed invention except for the recitation of two illuminating tubes instead of one. Wood discloses an illuminating decoration for a skateboard comprising an illuminating tube attached to two lateral sides of a skateboard and electrically connected to a control box provided at an underside of the skateboard such that the illuminating tube is turned on or off through control of the control box; the illuminating tube including a transparent tube and a plurality of light emitting elements disposed in the transparent tube and the illuminating tube being sealed at front and rear ends thereof such that the light emitting elements are enclosed in the transparent tubes to emit light and produce even brightness without the risk of being invaded by dust and moisture (abstract, figs 1-6); the transparent tube forming the illumination tube forming the tube is flexible and impact resistant It would have been obvious to one of ordinary skill in the art at the time the invention was made to have two illuminating tubes in the invention of Wood since it has been held that mere duplication of the essential working

parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, USPQ 8.

- With regards to the illuminating tubes being sealed at front and rear ends by means of front and rear covers, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use covers to seal a tube for the purpose of preventing exterior elements to permeate the tube. Furthermore such a practice is well within a level of ordinary skill and is used when it is required for an interior element such as a light source to be kept clean and moisture free.
